

SPAULDING COMPOSITES, Inc. Press Release #3

August 25th, 2017

Spaulding Composites, Inc of Rochester, NH is proud to announce the acquisition of Burbak Plastics of Wilton, NH. This strengthens Spaulding Composites commitment to become the leader in both advanced composite materials and specialized, high performance injection molding.

Burbak is a specialty provider of injection molded solutions (using high heat plastics) to the medical, firearms and defense industries with the ability to design and fabricate molds in-house. Burbak also offers a full array of secondary services including “white room” molding to meet a variety of medical standards of cleanliness and conformance.

Spaulding Composites President and CEO, Kenneth, J. Otto, said, *"We expect Burbak Plastics to be an excellent complement to our existing thermoset composites business. This acquisition will expand our runway for growth into all of our current markets. Burbak's extensive history of success with high performance plastics, quality and innovative product solutions contribute to its market leadership and we expect this to strengthen our position in several growth segments."*

Otto continued, *"By applying the lessons and efficiencies that Spaulding Composites has gained from Continuous Improvement, we believe that Burbak will be well-positioned to improve operational efficiencies and drive long-term growth and customer service. We look forward to welcoming the Burbak team to Spaulding Composites."*

About Spaulding Composites

Spaulding Composites, Inc. is a global, vertically integrated manufacturer of specialty composite materials and value-added fabricated products. Spaulding Composites has been a leader in thermoset composites and laminates for over 140 years.
